

THERAPY™ · MELBOURNE

THERAPY

CORPORATE

The Nervous System at Work

Everything begins here.

THERAPY™ is a clinical neuro wellness centre built entirely around nervous system regulation. We bring that environment into organisations — or host their people inside ours.

III

Partnership

The mind and body are one system. We treat it that way.

ENQUIRIES

hello@yourtherapy.au · 0456 582 489

THE THESIS

Regulation first.

Everything else is downstream of it.

Work asks a great deal of the nervous system. Deadlines, noise, travel, screens, and the low constant hum of being always reachable. Over months and years, the body learns to hold a state of readiness it was never designed to sustain.

Most corporate wellbeing meets this at the level of the mind. A talk. An app. A subscription nobody opens.

THERAPY™ works at the level of the body — because the nervous system does not respond to information. It responds to input.

Cold. Heat. Infrared. Pressure. Breath. Frequency. Oxygen. Food.

Every modality is selected for its relationship to autonomic state — the shift out of sympathetic drive into parasympathetic recovery. The vagus nerve carries that traffic in both directions, which is why the kitchen is not catering. It is a modality.

MICROBIOME

Nutripath pathology

Stations rotate. Teams move through. The room does the work.

WHY A DAY HERE IS DIFFERENT

A reset is temporary. Recalibration is structural.

A weekend retreat is a good weekend. People come back rested, and within a fortnight they are close to where they started — nothing was sequenced, measured or followed.

A day here is built differently. Not because the modalities are rarer, though some of them are, but because mind, body and gut are treated as one structure of support rather than three departments.

Sequenced

Modalities are ordered against one another, not offered from a menu. Breath before rotation. Heat before cold. Compression after load. The order is the intervention.

Measured

Body composition on arrival. What happens is recorded rather than recalled, so the next day is built on something other than how the last one felt.

Held

Practitioners on the floor throughout. A facility is not handed over to a group and left to run itself.

Tailored

Loading, sequence and frequency are set against that individual's own data. Two people on the same day are not on the same day.

Continued

Where a partnership is in place, the day feeds a set of self-care strategies, rebuilt each quarter against fresh data rather than repeated from a template.

A retreat is an event.

This is a system with a day inside it.

THERAPY™ describes how its programs are structured, not what they will achieve. Individual response varies and no outcome is promised.

THE CONTEXT

It isn't the days off.

Absence is the visible cost and the smaller one. Across Australian workplaces, presenteeism — people at their desks but working well below capacity through exhaustion, fatigue and poor sleep — costs more than absence does, and almost nobody measures it.

\$15,050

annual productivity loss per worker among the least psychologically healthy, against \$8,334 among the healthiest

\$3,200

average annual cost to an employer per employee with mental ill-health, in absence and presenteeism alone

\$6.1bn

lost to presenteeism across Australian workplaces each year — against \$4.7bn to absence

12bn

working days lost globally each year to depression and anxiety, near US\$1 trillion in lost productivity

PwC & Beyond Blue; KPMG; Safe Work Australia; WHO and ILO. Victorian mental injury claims have risen from 2% of all claims in 1985 to around 16% today.

Your largest cost is the people who came in anyway.

And since 31 March 2024, a Victorian worker has no entitlement to compensation where a mental injury was predominantly caused by stress or burnout arising from events considered usual or typical in their role. Bullying, harassment and inherent trauma remain compensable. Ordinary workload does not — so that cost stays with you.

These figures describe the environment employers operate in. They are not claims about THERAPY™. We make no representation that our programs improve productivity, reduce absence, or change any health outcome. We provide recovery and nervous system regulation.

WHERE WE SIT

Two directions. One nervous system.

Almost every workplace mental health provider works in one direction. A psychologist works top-down — thought, memory, pattern. A wellbeing provider works bottom-up — cold, heat, breath, movement. The nervous system does not care which door you came through, and very few providers offer both.

THERAPY™ has registered psychologists delivering CBT, DBT, EMDR and Schema Therapy, and a clinical floor delivering infrared, cold, compression, breath, oxygen and neuro stimulation. One system, approached from both ends, under one roof.

THERAPY™ IS

- Psychological therapy with registered psychologists — CBT, DBT, EMDR, Schema
- Physical intervention — infrared, cold, pressure, breath, oxygen, neuro stimulation
- Functional diagnostics and a gut-directed kitchen, in house
- Delivered in collaboration with each person's GP where appropriate

THERAPY™ IS NOT

- A crisis or after-hours service
- A replacement for the 24/7 national coverage an EAP provides
- A psychosocial hazard control under the Victorian Regulations
- A substitute for medical care

Everyone else works on the mind or the body.

We work on the system that connects them.

Psychological services are delivered only by registered psychologists. Corporate activations and memberships are recovery and regulation programs; psychological therapy is a separate clinical service, arranged individually and confidentially.

THERAPY™ ON-SITE

We come to you.

Offices, site launches, leadership offsites, wellbeing weeks.

Our practitioners bring the NeuroSuite into your workplace and run rotating regulation stations across the day. Teams move through in structured blocks.

Reset

HALF DAY · UP TO 40

\$7,900

+ GST

Opens with a whole-group breath session. Two practitioners on site. NeuroSuite rotating stations — infrared panels, PEMF, BrainTap, Normatec compression and hydrogen inhalation. Pulsetto™ vagal regulation station.

Immersion

FULL DAY · UP TO 80

\$11,900

+ GST

Opens with a whole-group breath session. Three practitioners on site. Full NeuroSuite rotating stations — infrared panels, PEMF, BrainTap, Normatec compression, hydrogen inhalation — with VR meditation and Pulsetto™ vagal regulation. 9D Breathwork close.

Flagship

FULL DAY · 100 +

\$15,500

+ GST

Opens with a whole-group breath session. Four practitioners on site and an extended rotation across the full NeuroSuite — infrared panels, PEMF, BrainTap, Normatec, hydrogen inhalation — with VR meditation and Pulsetto™. Priority scheduling and a dedicated coordinator. The day closes with 9D Breathwork — the full team, one room, one session.

COST PER PERSON, AT CAPACITY

\$198 EACH
\$7,900 across 40 people

\$149 EACH
\$11,900 across 80

\$129 EACH
\$15,500 across 120

A conference room, a projector and catering runs to a comparable figure.

Travel within 30km included; regional and interstate quoted separately. The PBM Light Bed, HOCATT™ and Technogym Wellness AI scanner are fixed installations, available only at the centre.

THERAPY™ · MELBOURNE · YOURTHERAPY.AU

06

EXOMIND™ · WORKPLACE PROGRAM

The clinic comes to you.

Eight to ten sessions across the year. Twenty-four minutes each.

ExoMind™ delivers targeted transcranial magnetic stimulation. A clinical device, delivered by a qualified practitioner to individually screened participants — not a station on a rotation. A course runs eight to ten sessions across a year.

We bring it to your premises. A participant loses twenty-four minutes, not half a day travelling to and from a clinic.

PROGRAM RATES

Standard clinic rate is \$550 per session. Delivered on site in volume, the rate falls with the size of the program.

\$495 EACH
48 – 79 sessions

\$465 EACH
80 – 119 sessions

\$440 EACH
120 + sessions

6 participants · 8 sessions	48 sessions · \$495	\$23,760
10 participants · 8 sessions	80 sessions · \$465	\$37,200
10 participants · 10 sessions	100 sessions · \$465	\$46,500
15 participants · 8 sessions	120 sessions · \$440	\$52,800

Eight sessions off site costs a participant a day and a half of work.

On site, it costs them three hours.

Level 3 corporate seats include four ExoMind™ sessions per participant each year, screened and delivered at the centre. The remaining sessions of a full course are charged at the program rate — see Corporate Partnership.

HOW IT IS DELIVERED

- Minimum six participants. Every participant is individually screened before their first session — the device is not suitable for everyone
- Delivered by a qualified practitioner, present throughout
- Each participant receives a personal between-sessions guide — sleep and light timing, breath practice, movement, and what to record
- Participation is voluntary and confidential. The employer is not told who took part
- A private, quiet room on site, and one THERAPY™ contact for the program

A clinical program, not a wellbeing activation. THERAPY™ makes no claim that it treats any condition. Suitability is determined at screening.

THERAPY™ · MELBOURNE · YOURTHERAPY.AU

07

PRIVATE HIRE

Or bring them to us.

Exclusive use of the centre. Restaurant included.

Board days, offsites and functions inside the environment itself, with access to the fixed installations that cannot travel. Exclusive use closes the centre to everyone else. Priced accordingly.

Board Day

HALF DAY • UP TO 12

\$9,900

+ GST

+ \$95 PER HEAD, FUNCTIONAL MENU

Exclusive morning use of the centre. Full NeuroSuite including infrared panels, the PBM Light Bed, and the Hot/Cold Circuit — infrared sauna and ice bath. Functional breakfast and lunch in the restaurant. Guided breathwork close.

Team Immersion

FULL DAY • UP TO 24

\$19,500

+ GST

+ \$145 PER HEAD, FUNCTIONAL MENU

Full-day exclusive use. Technogym Wellness AI body composition scanning on arrival. Rotating modalities across the NeuroSuite and recovery floor — infrared panels, PBM Light Bed, cryotherapy and hydrogen inhalation — Hot/Cold Circuit throughout, functional menu across the day. 9D Breathwork and sound healing close.

Evening Function

EVENING • UP TO 40

\$13,500

+ GST

+ \$120 PER HEAD, FUNCTIONAL MENU

Restaurant takeover with functional menu and non-alcoholic functional bar. Hot/Cold Circuit and infrared sauna access. Sound healing session.

ADD TO ANY FORMAT

9D Breathwork — up to 60 people

\$1,800

Sound healing close

\$1,200

Myotherapist in attendance

\$1,150 / day

Additional practitioner

\$950 / day

THERAPY™ — MELBOURNE

YOURTHERAPY.AU

ExoMind™ — max 16 sessions per day

\$550 / session

Extended rotation — beyond capacity

On application

08

CLIENT WELLNESS DAYS

Beyond the corporate box.

Host clients somewhere they will actually remember.

Client entertainment has not changed in thirty years. A box at the football, a long lunch, a bottle of something. A day at THERAPY™ does what hospitality is meant to do — give people time together — and sends them home in better condition than they arrived.

Client Day

FULL DAY • UP TO 20 GUESTS

\$24,000

+ GST

+ \$145 PER HEAD, FUNCTIONAL MENU

Exclusive use of the centre with a THERAPY™ host throughout. Full NeuroSuite — infrared panels, PEMF, BrainTap, Normatec compression and hydrogen inhalation — PBM Light Bed, cryotherapy and the Hot/Cold Circuit. Functional breakfast and lunch in the restaurant. 9D Breathwork close. Branded arrival and welcome.

Client Day — Extended

FULL DAY • UP TO 30 GUESTS

\$29,500

+ GST

+ \$145 PER HEAD, FUNCTIONAL MENU

As above, with an additional practitioner and a second rotation, plus sound healing alongside the breathwork close and a curated take-home from our partner brands.

WHY IT WORKS

- Guests spend six hours with you, not ninety minutes and a queue at the bar
- No alcohol required — inclusive of every guest, and nobody leaves diminished
- Comparable to a season of corporate hospitality, delivered in a single day
- A venue your competitors are not using

They will talk about it. That is the entire point of hospitality.

WHAT A SEAT ACTUALLY IS

One system. Three doors.

Nothing here is chosen in isolation.

A membership is not a pass to a building. It is a standing position across the three systems that carry a working week — the nervous system that sets the state, the gut that feeds the signal, and the mind that carries the load.

Nervous system

REGULATE THE STATE

- Hot/Cold Circuit — infrared sauna and ice bath
- NeuroSuite — PEMF, infrared panels, Normatec compression, hydrogen inhalation
- Pulsetto™ vagal stimulation, every visit
- Breathwork and sound healing

Self-care strategies to support the state, reviewed each quarter

Gut

FEED THE SIGNAL

- Functional menu, prepared in house — not catering
- Hydrogen-charcoal water throughout
- Microbiome pathology through Nutripath
- Gut-directed strategies built for the individual

Self-care strategies to support the gut, guided by functional markers

Mind

CARRY LESS OF THE LOAD

- BrainTap and VR meditation
- ExoMind™ neuro stimulation — Level 3 seats
- Mindfulness and breath gatherings
- Nurse consultation, scheduled through the year

Self-care strategies to support the mind, reviewed with a practitioner

The vagus nerve runs between all three.

That is why we do not build a protocol on one of them alone.

Inclusions vary by tier. Level 1 provides access and the baseline; Level 2 adds individually built self-care strategies; Level 3 adds ExoMind™. Full detail overleaf.

CORPORATE PARTNERSHIP

Not a discount scheme.

Employer-funded seats at member rate. Twelve months.

A single day is a moment. Regulation is a rhythm. Organisations fund seats for their people at our standard membership rate — the category is never discounted — and a twelve-month term unlocks diagnostics no casual member receives.

MEMBERSHIP SEATS

Regulate

One visit weekly

\$79 / WK

Rebalance

Two visits weekly

\$159 / WK

Integrate

Three visits weekly

\$249 / WK

EVERY CORPORATE SEAT INCLUDES

- Baseline blood panel on commencement, through an accredited laboratory
- Technogym Wellness AI body composition scan
- Full membership inclusions at the chosen tier

TAILORED TO THE INDIVIDUAL

- LEVEL 2 — self-care strategies built from that individual's own data: which modalities, how often, in what order, and what to do between visits — rebuilt every quarter against fresh results rather than a template
- LEVEL 3 — the above, plus four ExoMind™ sessions per participant each year, individually screened and delivered at the centre
- Reviewed throughout by a qualified practitioner; anything of clinical concern is referred to the individual's own general practitioner

The employee holds their health data. The employer never does.

Results are issued directly to the individual. THERAPY™ retains only what is required to build and update that person's protocol, under Victorian health records obligations. The organisation receives anonymised, aggregate participation reporting only — no individual pathology, body composition or personal data, at any point. THERAPY™ does not diagnose or treat.

At ten seats or more.

Below ten seats a partnership runs as employer-funded memberships with the diagnostics attached. At ten and above, the relationship changes.

- Two on-site activation days each year, included
- Quarterly Technogym Wellness AI scanning at the centre
- Dedicated concierge booking line for your people
- Anonymised, aggregate engagement reporting each quarter
- Partner rate on all further activations, private hire and client days
- Priority access to new modalities ahead of general release
- Named as a THERAPY™ Corporate Partner across our channels

Twelve-month term. Billed monthly to the organisation. Reviewed annually.

Start in the room.

Before any proposal, come through as our guest. Fifteen minutes in the space explains more than a document can.
