All intravenous infusions at THERAPY™ are administered by registered nurses following an individual nursing consultation and health screening. Where a prescription is required, it is issued by an independent medical practitioner following their own clinical assessment. Infusions may not be suitable for all clients; suitability is determined on an individual basis. Formulations listed describe ingredients only. Vitamins, intramuscular shots and additions are selected with your nurse following screening and charged individually. All prices are in Australian dollars and inclusive of GST; standard metro travel included with mobile appointments; pricing subject to change.
